DETAILED ACTION

1. Claims 13 and 14 have been canceled previously and claim 16 has been canceled in the amendment filed 10/16/08. New claims 32-40 (10/16/08) have been added and are drawn to the claimed invention.

Amended claim 12 is drawn to patentably distinct species of invention.

A species election on amended claims 12, 15, 17, and new claims 21-38 follows.

Election of species

2. This application contains claims directed to the following patentably distinct species of disease of the claimed invention:

Applicants are required to elect one of the following species of disease selected from:

- a) an autoimmune disease;
- b) inflammatory disease;
- c) prevention of allograft rejection; and
- d) alleviation of allograft rejection.

If any one of autoimmune disease or inflammatory disease are elected, Applicants are required to elect one of the sub-species of disease recited in claim 17 selected from:

arthritis, gastritis, pernicious anaemia, thyroiditis, insulinitis, diabetes, sialoadenitis, adrenalitis, orchitis/oophoritis, glomerulonephritis, experimental autoimmune encephalitis,

Art Unit: 1646

multiple sclerosis, chronic obstructive pulmonary disease, atherosclerosis, and inflammatory bowel disease.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 12, 15, 21-38, are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
